**Our MGS (Medium Gauge Steel)
Profile Factory**

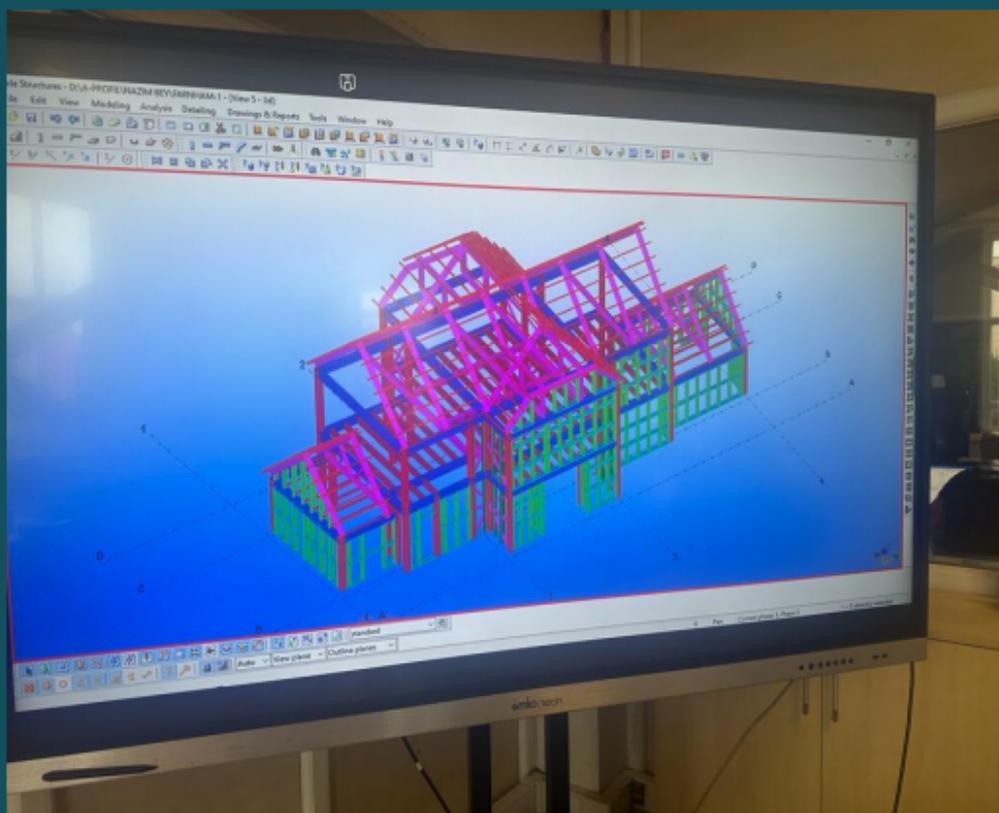

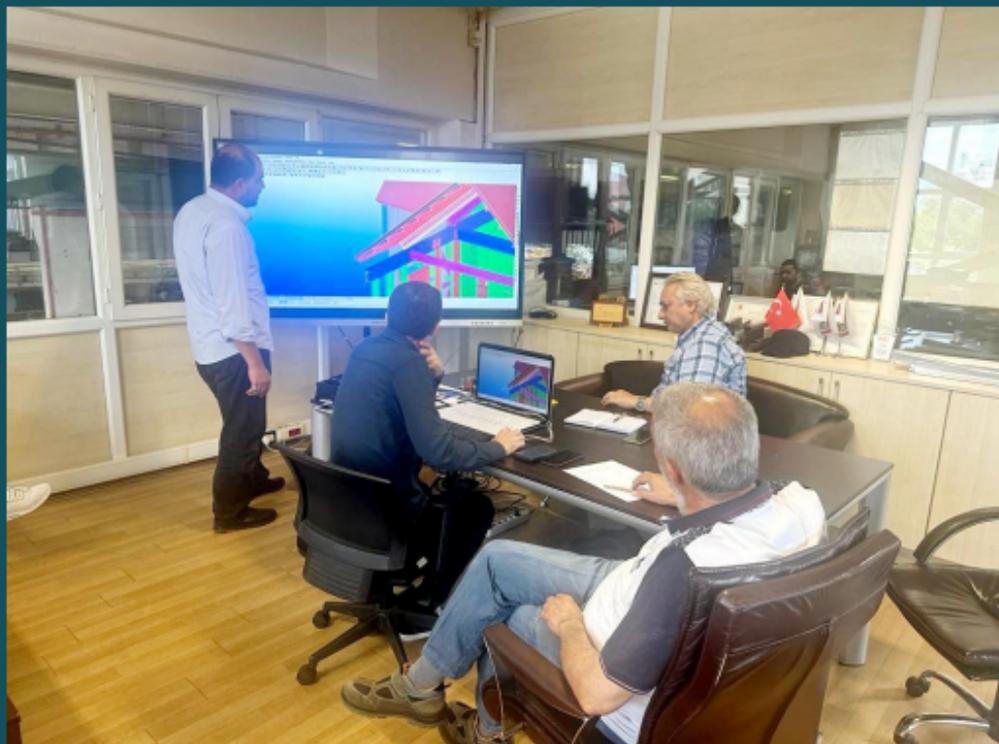

OUR FACTORY

We are manufacturing Medium-Gauge Steel Profiles using Cold-Roll Forming Machines in our Factory in Tuzla, Istanbul, Turkey.

We are the only Turkish Manufacturer who can produce Steel Profiles of thickness between 2 and 8 mm. This gives us the advantage of manufacturing and erecting 4 storey buildings and 12 mt high warehouses with strong steel frames and using less quantities of profiles, thereby reducing installation time and cost.

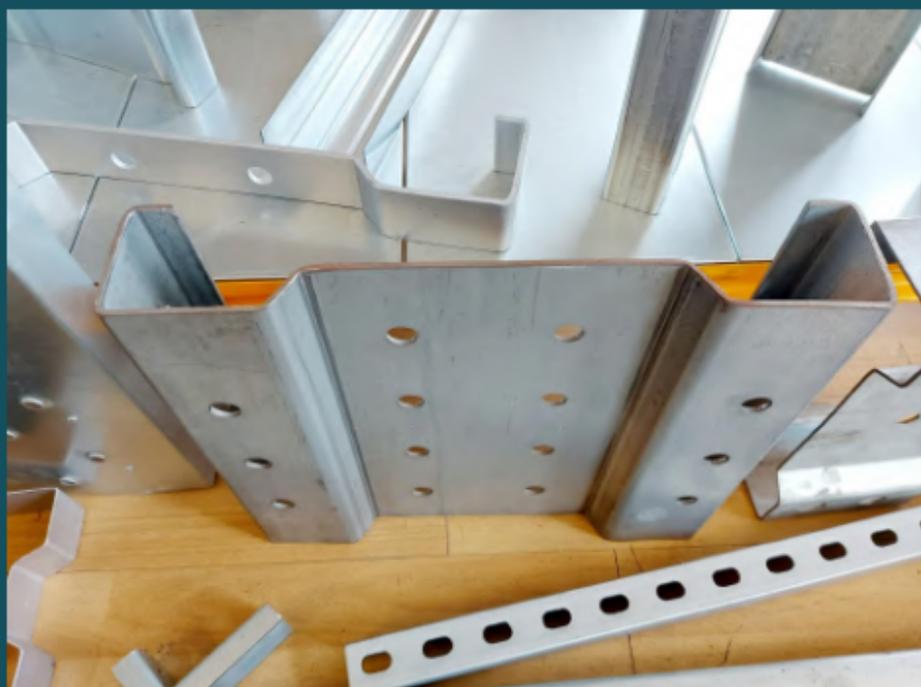

**Our machines are custom
designed and custom made**

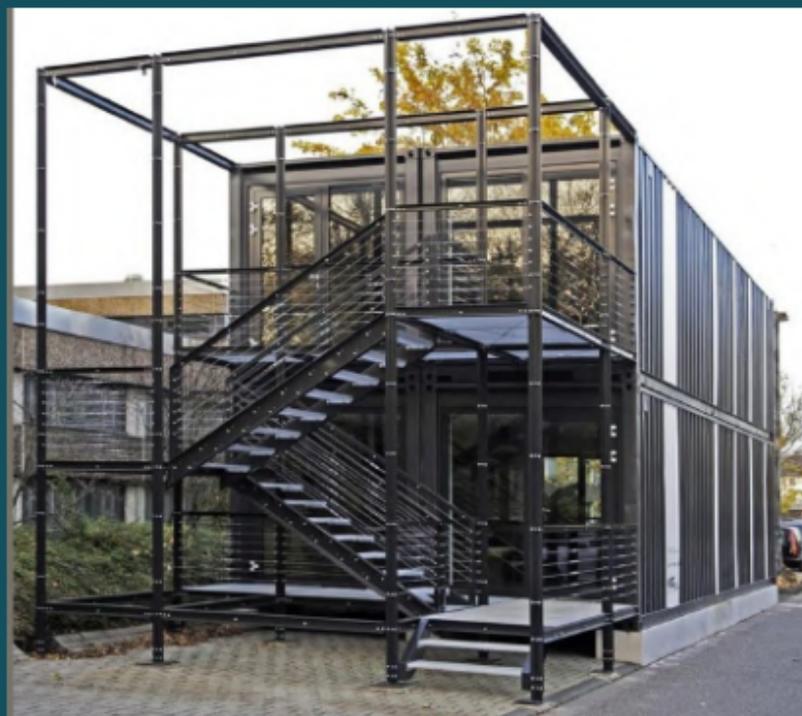

MGS SHOW-HOME
in our Factory
